Known Issues in the MOS 4.4.2–FCS Release

This document lists, by category, outstanding or unresolved issues that were known as of the MOS 4.4.2-FCS release date.

Address book

- u Deleted contact appears in "Edit Group" dialog box. "Invalid contact index" displays when you click "Ok". This issue no longer appears after logout/ login. (56793)
- u The WebMail address book can crash if patch E4_3_CE42_US_3 is installed and named brands are present for delegated domains. (57042)

Admind

- u Cannot import exceptions to single users. (57034)
- u Upgrading systems in a N+1 cluster requires that those systems are first removed from the cluster. In certain circumstances, the licenses will be revoked from a system once de-clustered as they are not valid for that node. First applying the correct licenses for that node may mitigate the issue. (57079)

Branding

- u "ERROR file too large" while publishing the brand containing chinese locale. (56933)

Calendar

- u The "Repeat until" date is changed after saving the event. This can lead to a repeated event's last instance not appearing in a user's calendar if they are in a different timezone. (56799)
- u In calendar when Time Mode = 24 hrs and Day spans from 0 to 24 hrs, new event created at 0:00-1:00 appears twice in "Horizontal Week View". Once on previous day after 23:00 hr cell and another at correct place at 0:00 cell. (56813)
- u Event update by person with whom the calendar is shared with write access doesn't work as expected. (56814)

- u Repeated event can't be viewed by person with whom the calendar is shared if the user is given read/write permission. (56816)
- u When owner deletes the event from calendar, the notification is not sent to attendees and also event from attendees's calendar is not deleted. (56851)
- u Unable to open/download attachment from any event instance belonging to repeating events in CE. (56981)
- u Calender CE uses local machine time to decide age of an event. (56990)

CLI

- u "MON SETTHRESH SYSTEM.NTP*RESP 0" does not disable "System Alert: External NTP Service check failed" alerts. (56951)

Console

- u The "MON Clear" command doesn't clear the alerts returned by "MON Status". (57087)

Enterprise UI

- u Automatic word wrap is not operating correctly. (52549)

Fastpath

- u When recipient domain is not resolvable, the mail is delivered to user on local machine. (57040)

Filter

- u A mail going through the redirect filter also sends a copy to original destination. The redirection works but you also receive a copy in original destination mailbox. (57023)

Health Monitor

- u PSU monitoring on S800 and RG280 not enabled. (57078)

Hardware

- u "stat get system.voltage" command does not work. (56891)

Installer

- u Installer errors: Cannot find kickstart file on CDROM attached via USB. (57077)

WebMail

- u Users are not displayed in the Sharing Control section of the UI when they have been enabled with read or write permissions. This occurs with IE9 only. (56379)
- u Error after double-clicking checkbox in sharing controls. Once user double clicks any of the check box under Options" -> "SharingControls", subsequent single/double click on those check boxes will result in checkbox getting converted to text box. (56809)
- u If the user is logged into a portal page, logging out redirects to the respective login page of webmail edition and not to the portal page login. (56944)
- u "No conflict" alert is shown when creating an all day event, although there exist a regular event on the same day. (56954)
- u Signature is displayed incorrectly above compose window in IE8. (57003)
- u If a user with auto reply enabled receives an e-mail which has the "Reply-to" header split over more than one line then the user can receive a non-delivery report relating to the auto reply. (57051)
- u In certain circumstances the display name is not displayed correctly when a reply is sent from WebMail to Mac OSX. (57084)
- u All day event cannot be changed to event less than All day. (57088)
